

## Securit 5400 Software

The mid to high level ID card software

The Securit 5400 database is based totally on MS Access, making it ideal for situations where a multi-user application is required. The 5400 offers you flexibility, security and reliability. A complete package with advanced features. Securit 5400 supports all forms of contact and contactless encoding. You control the card issuing process from creating the database and the card layout to the printing of the card.

Securit 5400 comes complete with Database Layout Creator and Badge Creator modules, is fully upgradeable and provides another excellent starting level for producing ID cards at a professional level.

### Design

- Unlimited badge templates
- 25 barcode symbologies supplied (including Code 39, PDF417)
- Import bmp and jpg files
- Card layout wizard

### Encoding

- Magstripe Encoding
- Barcodes
- Smart Card Encoding
- Mifare Encoding
- iClass Encoding
- Legic Encoding

### Images

- Live Image Capture
- Multiple Photos per record
- Control camera via software
- Webcam support
